Your Global Business Partner
In Fabrication, Construction
And Maintenance Services

Dynamic Industries, Inc.
WorldWide Capabilities
FACILITIES
Dynamic Industries, Inc. (DII) has combined domestic construction and fabrication facilities that span more than 340 acres. Our three major fabrication facilities consist of two yards in New Iberia, Louisiana (East and West Yards), and our Lake Charles, Louisiana yard.

Structures up to 6,500 tons can be loaded out in our New Iberia yards, and up to 10,000 tons in our Lake Charles yard. DII has fabricated offshore oil and gas topsides up to 8,500 tons. Regardless of the size of the structure, our clients receive the same commitment to safety, quality and schedule.

Three support facilities in Harvey, and Curtis Lane, Louisiana and Ingleside, Texas provide secondary structural and pipe fabrication services as well as serving as shore bases for our offshore maintenance and construction crews in the Gulf of Mexico.

DII has fabricated structures in our Louisiana yards for installation in the Gulf of Mexico as well as international locations. We also utilize our fabrication facilities in other countries when local content is a requirement or offers a better solution for our clients. We currently provide fabrication capabilities from facilities in Angola and Venezuela.

FABRICATION & ASSEMBLY
DII is a proven leader in heavy and light fabrication capabilities, from fabrication of offshore jackets, drilling and production decks to process modules. Our fabrication assets and the ability to ship completed projects by water, rail and road enables DII to support our clients’ domestic and international projects.

BROWNFIELD CONSTRUCTION
No other scope embodies the unique capabilities and expertise of DII as much as brownfield construction. DII is familiar and comfortable with the demanding requirements and risks of executing domestic and international brownfield construction on a turnkey EPCI basis. We also perform as the turnkey construction for an EPC/EPIC contractor, typically an engineering and project management company representing the operator.

EPC/EPIC PROJECTS
While not common in the Gulf of Mexico, the EPC or EPCI contracting model is the norm for large CAPEX international offshore oil and gas projects. Using our unique business model, DII has successfully executed international greenfield EPCI projects. We secure EPC/EPIC contracts by leveraging our fabrication, technical services, offshore marine equipment, construction labor, equipment rental and material supply companies.

HOOK-UP & COMMISSIONING
DII started in 1985 as an offshore hook-up and commissioning contractor in the Gulf of Mexico. Today, through the portfolio of companies in Dynamic Energy Services International, we are the largest privately owned hook-up and maintenance contractor located in the Gulf of Mexico, servicing projects worldwide for upstream and downstream clients.

SERVICES
Dynamic Industries, Inc. (DII) provides expansive and integrated full-service fabrication, construction and maintenance services to a broad range of worldwide markets, including upstream and downstream oil and gas, industrial and mining.

From structural steel fabrication of offshore jackets, drilling and production decks to process plant modules, DII is a proven leader in heavy and light fabrication capabilities. We have the ability to transport finished projects by water, rail and truck from our facilities located around the world.

Complementing our core fabrication capabilities, DII provides a comprehensive array of essential field services. From installation and connection of the fabricated parts, through commissioning and ongoing facility maintenance, both domestically and worldwide, DII is the logical choice.

For more than 25 years DII has created lasting partnerships with our customers, industry-leading design and engineering groups, and EPC firms around the globe. Our reputation and expertise have helped us achieve “Core Contactor” status for some of the largest oil and gas operators in the world.

TURNKEY MAINTENANCE
One of DII’s core businesses is the ongoing maintenance of operating oil and gas assets in the Gulf of Mexico. Our more than 2,000 highly skilled craftsmen go through the most comprehensive SH&E training in the industry. Our superintendents are experienced in managing the assembly of the right crews and equipment to ensure the work is performed efficiently and safely.
Due to our unrelenting commitment to safety, our clients view us as among the **safest** fabricator and construction services firms.

**SAFETY, HEALTH & ENVIRONMENT.**

Dynamic Industries, Inc. (DII) has built an organization that values the safety and health of our employees and protection of the environment through visible leadership and commitment at every level of the organization.

As a company, we are continually striving to improve our performance by measuring and monitoring our SH&E processes. As part of the measurement process, we routinely recognize exceptional performances by our employees and crews.

SH&E is considered a Core Value within our organization, with our motto being “Everyone Arrives Home Safely.” Our belief is every incident is preventable, and we constantly communicate Lessons Learned through Safety Alerts, SH&E Meetings and Safety Moments in internal meetings. We are tireless in our analysis of behavioral safety observations and communicating and implementing those findings into our process of continuous improvement to our zero tolerance safety culture.

At DII, Safety is more than a priority, it is a Core Value. We are committed to an incident and injury-free work environment. This includes all levels and divisions of our organization: from top to bottom. We strive to maintain an SH&E culture second to none in our industry and are always seeking ways to improve upon our SH&E performance and protect the environment in which we live and work.

Dynamic Industries, Inc. coupled with the specialty products and services of its sister companies, is able to provide its offshore and onshore clients a total solution to their fabrication and construction needs.
