

## NEWS RELEASE

### **Dynamic Construction Services, a division of Dynamic Energy Services International, LLC, is expanding operations in the Eagle Ford Shale**

**New Orleans, Louisiana – September 25, 2013** - Dynamic Energy Services International LLC, a leading fabrication and service provider to the Global Oil, Gas and Energy Industries, announced today that the Technical Division of **Dynamic Construction Services** has acquired property in Gonzales, Texas, and will start construction in October 2013 on a new campus that will include a dedicated facility with a state of the art panel shop with additional plans for a dedicated fabrication facility for the Company's Mechanical Division. Gonzales will join the well-established location in Carrizo Springs, Texas. This expansion will further enhance **Dynamic Construction Services** as a premier player in the Eagle Ford Shale, as well as the Marcellus and Utica shale. **Dynamic Construction Services** offers a full range of services, including site development (fabrication & installation of well site equipment and well pad hookup), I&E, automation, control panels, fire & safety, and H2S services making it *"Your ONE Source from Wellhead to Sales Line"*.

Bryan Delahoussaye, Vice President of the Technical Division said, *"We are extremely excited about the potential of our new facility as Gonzales is ideally located at the conjunction of the Eagle Ford shale to the south and west and the rapidly developing Eaglebine shale to the east and north. Gonzales County and the adjoining counties to the west constitute the liquid-rich "sweet spots" of the entire Eagle Ford and are also the least developed counties in the Eagle Ford. In conjunction with our extremely successful operation in Carrizo Springs, Texas, locating in Gonzales permits **Dynamic Construction Services** to service the entirety of the Eagle Ford shale as well as pursue opportunities in the Eaglebine shale."*

#### **About Dynamic Energy Services International, LLC**

Founded in 1985 as an offshore service company, Dynamic Energy Services International LLC ([www.dynamicind.com](http://www.dynamicind.com)), is a major fabricator and a leading brownfield, hook-up and commissioning contractor in the Gulf of Mexico, West Africa, the Caribbean Basin, and, upon the opening of our new location in second half of 2013, Saudi Arabia.

Headquartered in New Orleans, LA, Dynamic provides fully integrated EPCIM services globally to the upstream and downstream markets.

### **About Dynamic Construction Services**

Dynamic Construction Services is one of the largest offshore construction companies servicing the US GoM with shore bases for the Western, Central and Eastern Gulf in Harvey, LA, New Iberia, LA, and locations throughout Texas, including Alvin, Dumas, Ingleside, Carrizo Springs, and Gonzales.

The Company has aggressively expanded into the shale plays providing a full line of site development services and a full line of specialty craft services in Texas in the Eagle Ford Shale, in W. Virginia and Pennsylvania in the Marcellus Shale, and in Ohio in the Utica Shale. The specialty craft services include electrical & instrumentation, automation, coatings, mechanical/civil services, fire & safety, scaffolding, staffing, and plant services.
