NEWS RELEASE

Dynamic Industries, Inc. - Political Representatives and Plant Owners help celebrate Dynamic's Lake Charles facility expansion.

Lafayette, Louisiana – October 30, 2014 – Dynamic Industries, Inc., a leading fabrication and service provider to the Global Oil, Gas and Energy Industries, hosted an open house event on October 14, 2014 at its Lake Charles fabrication facility to celebrate the completion of their capital improvements and expansion. Local plant owners, operators and developers along with local, state and national political representatives attended the event where they toured the facility and reviewed the expansion. A number of guest speakers including Congressman Charles Boustany, Speaker Chuck Kleckley and Mayor Randy Roach spoke about the unprecedented amount of projects coming to the area, the importance of those projects to local area businesses and the state of Louisiana, and the role companies such as Dynamic will have in supporting these projects.

US Congressman Charles Boustany, Jr. said, *“As South Louisiana continues to lead the way in liquefied natural gas production and developing gas-to-liquid technology, the importance of Dynamic Industries’ expanded presence cannot be understated. This impressive facility will be able to support large petrochemical projects coming to this area while providing good-paying manufacturing jobs for Louisiana families. I thank Dynamic Industries for allowing me to visit and look forward to working with this company to make South Louisiana a global hub for energy production and export.”*

Emile Dumesnil, President & CEO of **Dynamic Energy Services Int’l, LLC** said, *“With \$70+ billion in new construction projects coming to Lake Charles over the next 5 years, the advantages of a modular fabrication strategy have never been more beneficial than at this time and in this place. Dynamic’s multiple-yard modular fabrication approach is **the** single solution that solves many challenges by pulling manhours off site, reducing pressure on the site workforce, reducing congestion, improving site safety, and fabricating in a controlled work environment offsite right here in Louisiana. Louisiana and Dynamic have the facilities, expertise and experience to get the job done and we look forward to proving that to Sasol, Magnolia and the many projects that have the wisdom to go modular and go Louisiana.”*
