

DYNAMIC INDUSTRIES, INC.

DII AWARDED CONTRACT FOR MARINE WELL CONTAINMENT COMPANY (MWCC)

Houston, Texas, USA – December 9, 2012 – Dynamic Industries, Inc. (DII) has been selected to fabricate and deliver components of Marine Well Containment Company's (MWCC) expanded containment system.

In addition to the fabrication of module support frames (MSFs) for the process modules, DII's Lake Charles deepwater fabrication facility has been chosen as the location for the installation of the MSFs and riser turret components on the system's marine capture vessels (MCVs), as well as the integration, hookup, and commissioning of the MCVs.

The expanded containment system is being engineered for use in water depths of up to 10,000 feet in the U.S. Gulf of Mexico. The system has the capacity to contain up to 100,000 barrels of liquid and handle 200 million cubic feet of gas per day. For more information, please visit www.marinewellcontainment.com.

About Dynamic Industries, Inc.

DII is a wholly-owned subsidiary of Dynamic Energy Services International, LLC, (DYNESI), formerly Moreno Group Holdings, LLC, a group of diversified companies whose products and services provide a total fabrication and construction solution to their clients' needs in the energy industry.
